

Falmouth Divers Ltd

International Subsea & Marine Contractors

Offshore Wind Farm Services

Since forming in 1978 Falmouth Divers Limited has become one of Europe's leading multi-discipline Diving, Subsea and Marine Civil Engineering Contractors. Over the years we have developed vast experience in the installation, repair and maintenance of offshore wind farms. This, together with our expertise in the submarine cables industry, makes us an ideal partner for your project.

The type of projects we have worked on include:

World's First Open Sea Wind Turbines

Falmouth Divers were the diving contractors for the foundations and export cables at the world's first open sea wind turbines. We also undertook construction of manholes, ducts and lay of an additional submarine river crossing cable.

80 Turbine Field in Denmark

World's first large scale offshore wind farm - Falmouth Divers were diving contractor for all inter-turbine cables.

30 Turbine Field

UK's first large scale wind farm - Falmouth Divers were diving contractor for all inter-turbine cables.

Turnkey Contractor

Falmouth Divers were the Turnkey contractor for renewing the export cable following a new route, including land cable installation, duct installation, manhole construction and removing the redundant export cable.

Falmouth Divers has provided diving support for various Contractors on the different sites and have carried out all manner of tasks from initial site surveys, construction and connection phase support and subsea export and inter-turbine cable lays. We have also acted as Turnkey Principle Contractor for complete installation of export cables including all land based civil engineering works, jointing and terminations, pre and post lay cable testing.

We also have undertaken removal of debris and materials from WTG towers following commissioning, offshore crew transfers, installation of land cables, shore ducts and the construction of joint bays and manholes. Our experience also extends to recovery and disposal of redundant cables to help Clients meet their whole life responsibility on decommissioning.

Falmouth Divers also benefit from extensive experience working under the Construction (Design & Management) (CDM) Regulations 2007 and we have performed the role of Principle Contractor and specialist Sub-Contractor. Our attitude of responsibility and management of project Health & Safety has not failed to see projects successfully through without incident.

Delivering In-depth Solutions

Falmouth Divers Ltd

International Subsea & Marine Contractors

Why Choose Falmouth Divers

Our long history of working on wind farm installations has given us unrivalled experience from a civil engineering, diving and cable laying contractor's perspective. We feel many of the operational problems can be mitigated with proper planning and the unforeseen problems can be minimised or rectified quickly with experienced personnel who have done the task before.

Services provided:

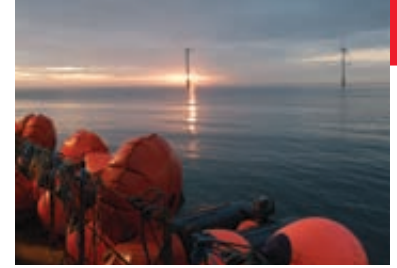

- Cable installation and repair
- J Tube installation and or modification
- Shore end landings
- Scour protection systems
- Cathodic protection systems and anode replacement
- Paint coat repairs
- Land based civil engineering works
- Cable debris clearance from towers
- Personnel transfers and safety boat cover
- Riggers on barge deck or on towers
- Machine maintenance duties
- Safety boat cover
- Load out work ashore

We offer the benefit of:

- Long established professional company
- Extensive offshore wind farm and cable experience
- Very good financial resources
- Extensive burial machine experience
- Large inventory of plant and equipment to allow for spare kit on site and back up
- Experienced and well-motivated personnel
- Engineer support at Head Office
- Excellent Health and Safety record
- Charge out rates in-line with national averages
- In-House Diving Support Vessels
- Worked from many of the vessels active in the Wind Farm market
- Audited by major clients such as Shell, Amec, MOD, RNLI

Falmouth Divers key asset is it's 30 years of experience and our intimate knowledge of the sea. We have the ability to offer a complete project package, or to act in a specialists role in a demanding environment where knowledge derived from experience talks loudest and achieves best results.

We would like to talk with your project team to discuss your planned operations and to add the value of our experience to your project.
